

TASK: 1OBJECTIVE:

Write a program that takes any character as input in lower case & convert into upper case by using 3rd type function.

SOURCE CODE:

```
#include<stdio.h>
#include<conio.h>
char alpha(void);
void main(void)
{
    clrscr();
    char a;
    printf("Enter any character in small =");
    a=alpha();
    printf("\ncharacter in capital is =%c",a);
    getch();
}
char alpha(void)
{
    char ch;
    ch=getche();
    if(ch>10&&ch<122)
    ch=ch-32;
    return(ch);
}
```

OUTPUT:

```
Enter any character in small =a
character in capital is =A
```
