

TASK: 2OBJECTIVE:

Write a program that takes any time in hours as input & convert it into minutes by using 4th type function.

SOURCE CODE:

```
#include<stdio.h>
#include<conio.h>
int time(int);
void main(void)
{
    clrscr();
    int h,ans;
    printf("Enter time in hours=");
    scanf("%d",&h);
    ans=time(h);
    printf("Time in minutes =%d",ans);
    getch();
}
int time(int h)
{
    return(h*60);
}
```

OUTPUT:A screenshot of a terminal window with a black background and white text. The first line shows the prompt 'Enter time in hours=' followed by the input '6'. The second line shows the output 'Time in minutes =360_' with a cursor at the end.

```
Enter time in hours=6
Time in minutes =360_
```
